EDUCATION

University of Arizona

Tucson, AZ

M.S. in Statistics and Data Science (GPA: 4.0)

August 2025 – May 2027

B.S. with Honors in Statistics and Data Science (GPA: 4.0)

August 2023 – May 2026

- Minor in Computer Science
- Honors and Awards: Summa Cum Laude, Graduate Interdisciplinary Programs (GIDP) Herbert E. Carter Travel Award, ASA DataFest Arizona Winner, Galileo Circle Scholar Award, Wildcat Distinction Award

TECHNICAL SKILLS

- Languages & Frameworks: Java, Python, SQL, JavaScript, R, Bash, FastAPI, Flask, PyTorch, Scikit-Learn, Agentic AI
- Tools & Platforms: Git, Docker, Linux, REST APIs, MongoDB, PostgreSQL, Redis, REDCap, Jupyter, Conda, Jira, LaTeX
- Software Engineering, Cloud Systems Deployment, Agentic AI/Machine Learning Systems, and Statistical Data Modeling

EXPERIENCE

USDA ARS, Southwest Watershed Research Center

Tucson, AZ

Graduate Machine Learning Intern

May 2026 – Present

- Architects advanced machine learning models for time series forecasting of streamflow presence in non-perennial streams.
- Presents results to scientific stakeholders to support conservation and water-resource management initiatives.

IBM

Tucson, AZ

Backend Software Engineer Intern – Storage Defender

May 2026 – August 2026

- Engineered a customer-facing AI agent that bridges Business Impact Analyses (BIA) and Defender data governance profiles.
- Built a reusable agentic AI test library that standardizes agent development across the team and optimizes performance.
- Presented technical architecture and results to IBM Storage executive leadership, including the General Manager and CTO.

Arizona NASA Space Grant Consortium

Tucson, AZ

NASA Space Grant Intern

September 2025 – May 2026

- Developed high-resolution remote sensing tools for monitoring surface water in non-perennial streams with satellite imagery.
- Performed statistical time series analyses to identify hydroclimatic drivers of streamflow intermittency in semi-arid regions.
- Presentations: American Geophysical Union Annual Meeting, USDA ARS Lightning Talk Seminar, Upper San Pedro Partnership Technical Committee Meeting, Arizona NASA Space Grant Consortium Statewide Student Research Symposium

Mel and Enid Zuckerman College of Public Health at University of Arizona

Tucson, AZ

Biostatistician – Community Environment and Policy

September 2025 – May 2026

- Conducted PFAS (forever chemical) exposure and occupational cancer research for the Fire Fighter Cancer Cohort Study.
- Designed survey instruments, architected data storage structures, and delivered statistical insights to reduce exposure risks.

College of Science at University of Arizona

Tucson, AZ

Teaching Assistant – Mathematics

January 2024 – September 2025

- Courses: Vector Calculus, Calculus II, and Calculus Concepts for Business

PROJECTS & ACTIVITIES

Honors Thesis

March 2025 – May 2026

- Developed LSTM and XGBoost methods for time series forecasting of Valley Fever infections in Maricopa County, AZ.
- Emphasis on parsimony, computational efficiency, and reliance on publicly accessible data using environmental features.
- Presentations: 8th International Coccidioidomycosis Study Group Symposium, Franke Honors Pinnacle Symposium

Lenkin Gallery of Possibility Committee

October 2025 – May 2026

- Collaborated with W.A. Franke Honors students and faculty to redesign the Honors Village gallery to showcase research.
